#BakerBuildsChiropractors

Your future, *faster*.

Baker University's Prechiropractic Science Program allows academically talented and highly motivated exercise science students to seamlessly matriculate to the chiropractic program at Cleveland University-Kansas City after three years.

## **3+3** Degree Path

In just six years, students will earn both a bachelor's degree in exercise science from Baker and a Doctor of Chiropractic Science from CUKC. The 3+3 model allows students to enter the job market earlier, reduce their total education cost, and receive a diverse, well-rounded education.

We call that a **win-win-win** situation.

## CHIROPRACTIC ADVISOR

You will be partnered with an advisor from CUKC to help make the process as simple as possible. Your advisor will point you toward undergraduate courses that will prepare you for graduate study, suggest internship possibilities, and provide support and guidance as you go through the application process.

Baker's liberal arts curriculum develops essential skills for anyone entering the chiropractic profession. Students can participate in study abroad programs, summer-long or semester-long externships, and other clinical opportunities that enhance chiropractic science expertise and workplace readiness.
