## A Message For Parents

Membership in a Greek organization is an asset your daughter can take advantage of during the transition from high school to college. Through it she will develop the ideals of trust and friendship, responsibility and maturity.

Sisterhood is a special bond that forms within each chapter and will give your daughter the strong foundation from which she can securely branch out into other areas of campus life, knowing she will be supported in her endeavors.

Further, the opportunities to develop friendships outside the chapter are limitless as she will be encouraged to become involved in other campus organizations. These lasting friendships make the college experience more enriching and expand your daughter's horizons and foster her social and academic growth.

The Greek experience will help your daughter become a mature, responsible woman, prepared to face whatever her life may bring!
